# Project for Plotting to Re-Imagine Interstate Migrations Project PRISM

Presented by Team JABAscript: Justin, Alicia, Borg(Rob), Alexei

# The problem

### Misconceptions

Dishonest actors distort perceptions of internal migration flows inside the United States to serve ideological ends. Media sources tend to fixate in anecdotes instead of hard data in order to serve convenient narratives.

### Mixed Messages

While inter-state migrations are a common, regular phenomenon in the United States, data about them tends to be a confused muddle. Laypersons will find it difficult to understand data.

### Problem statement

Project PRISM aims to combat misconceptions about the complex phenomenon of internal geographic mobility in the United States.

# Solution

Since data about multiple migrations is hard to understand; PRISM provides data visualizations as a prism through which to better understand them.

Graphs speak louder than numbers.

The right diagrams can allow ordinary people to have more informed opinions about this phenomenon.

## Challenge 1

Migration data is fragmented, imprecise, and difficult to find.

### Challenge 2

Migration data requires a large dataset to adequately address

# Challenge 3

Common diagrams are not appropriate for this kind of data.

### Challenge 4

Required 51 CSVs, one for each state plus Washington D.C.

### Challenge 5

With 522 rows by 109 columns, it took considerable effort to manipulate data into useable form.

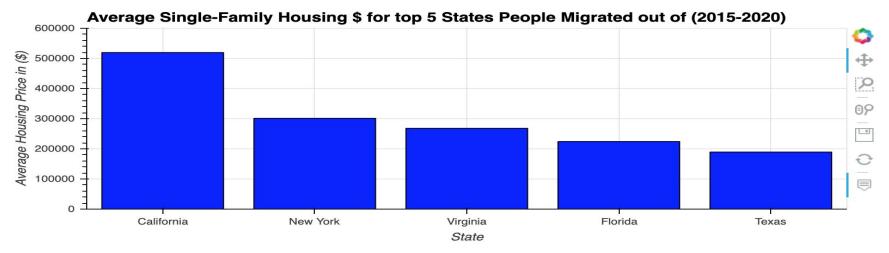

## Challenge 6

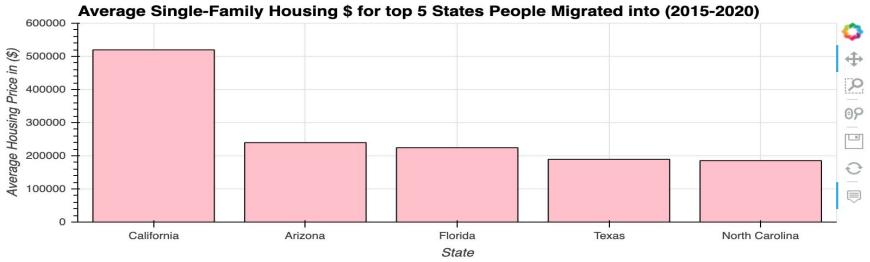

The index only showed the 'Origin' state, not the 'Destination' state.

Continue to improve web app via CSS and HTML

Add 2020 data when released by US in July.

2024: Use new ACS data to update plots and keep updating every 5 years.

Broaden data and analysis to include all ages and education level, income tax, work industry

Alexei: Git more matches on Bumble

Git jobs but maintain team communications

# Conclusion

The PRISM team invites everyone to form their own informed opinions. The goal of PRISM is to inform by making data understandable; not to interpret it for others.

We can offer explanations but deign not to impose our own conclusions.

# Thank you Shukraan lek Spasibo Gracias

We appreciate your attention. Please have a nice weekend; and git vaccinated. See you soon, in person.
